Thursday, March 28, 2024

8:30 am -3:30 pm

Location & Parking:

151 Centennial Ave,

Piscataway NJ 08854

Join your colleagues for this immersive interprofessional educational experience where evidence-based information on the Neurocognitive Disorders will be provided through fictional character depictions from selected Shakespearean tragedies.

Couse Objectives

- Recognize the 3 common presenting signs of Delirium
- Discuss the general biopsychosocial approach to someone with Delirium
- Name the 4 criteria defining a Neurocognitive Disorder
- Identify 2 classes of medication commonly prescribed for the management of Major Neurocognitive Disorder

Target Audience

Interprofessional Behavioral Health Care Providers, Students, Researchers and Stakeholders.
